

PROFILE SUMMARY

- Senior React Developer with 7 years of experience building production React applications at scale across developer tooling, observability, and marketplace platforms, specializing in component architecture, performance optimization, and type-safe React.
- Hands-on coverage across React frameworks (Next.js, Remix), state management (Redux Toolkit, TanStack Query), styling (Tailwind CSS, shadcn/ui), testing (Vitest, Playwright), and languages (TypeScript, JavaScript) with strong fundamentals in React hooks composition, accessibility-first markup, and Core Web Vitals discipline.
- Deep expertise in composition-first component design, predictable state management, performance-aware rendering, and accessibility-first UI delivery, leveraging methodologies such as React Server Components and streaming patterns and design-system-driven UI development to drive fast, accessible, type-safe React applications shipped at production quality.
- Engaged collaborator working cross-functionally with Design, Product, Backend, and SRE teams in Agile and continuous-delivery environments, contributing to design-review forums, sprint planning, and architecture discussions with a pragmatic, ownership-first mindset.
- Emerging leader who shares technical excellence and fosters a culture of component reusability and accessibility discipline through PR reviews and component docs, while leading React community-of-practice sessions and authoring widely used component and hook templates.

TECHNICAL SKILLS

React & Frameworks:	React 18+, Hooks, Next.js (App Router), Remix, React Router v7, React Server Components, Suspense, streaming, ISR
State Management:	Redux Toolkit, Zustand, Jotai, Recoil, MobX, Context API, useReducer
Data Fetching & APIs:	TanStack Query (React Query), SWR, Apollo Client, tRPC, REST, GraphQL, Axios
Styling & UI:	Tailwind CSS, CSS Modules, styled-components, Emotion, vanilla-extract, shadcn/ui, Radix, MUI, Chakra, Mantine
TypeScript & Tooling:	TypeScript (strict), ESLint, Prettier, Vite, Turbopack, esbuild, pnpm, Husky
Testing:	Jest, Vitest, React Testing Library, Playwright, Cypress, Storybook, MSW, Chromatic
Performance & Web Vitals:	React DevTools, Lighthouse, LCP/INP/CLS, code-splitting, lazy loading, virtualization, bundle analysis
Accessibility:	WCAG 2.2, ARIA patterns, semantic HTML, keyboard navigation, screen-reader testing, axe-core

EDUCATION

Stevens Institute of Technology B.S. in Computer Science

Hoboken, NJ • Sep 2015 - May 2019

WORK EXPERIENCE

Datadog Senior React Developer

New York, NY • Mar 2022 - Present

- Drove React component development and design-system delivery across Datadog product UI surfaces supporting 12 product squads, shipping dashboards, query editors, and analytics surfaces across 400+ production components.
- Architected client and server state with Redux Toolkit for cross-feature global state, TanStack Query for server-state caching, and Zustand for feature-local state across 18 feature stores, eliminating 6+ state-related bug classes the team used to hit each quarter.

- Led App Router migration on **Next.js** and **Remix**, shipping **React Server Components** for data-heavy routes, streaming UI above the fold, and ISR on marketing pages, with **60+** routes migrated and a **38%** drop in JS bundle on hot routes.
- Owned TypeScript adoption and type-safe React work through **generic component typing** with discriminated unions, end-to-end typing via tRPC and generated GraphQL types, and strict-mode TypeScript with no implicit any, lifting **TypeScript** coverage from **64%** to **98%** and cutting runtime **TypeError** incidents by **71%**.
- Drove React performance and Core Web Vitals work through **React DevTools profiling**, memoization with **useMemo**, **useCallback**, and **React.memo**, and route-level code-splitting with list virtualization, pulling **LCP** from **3.6s** to **1.2s** and holding **INP** under **200ms** on **95%** of sessions.
- Built API integration and data fetching with **TanStack Query** for caching and optimistic updates, typed REST clients with generated schemas, and GraphQL queries via Apollo Client across **80+** endpoints, removing **3** categories of redundant network calls and dropping average request count per page by **42%**.
- Delivered styling and UI component library work with **Tailwind CSS** plus custom design tokens, **shadcn/ui** primitives on top of Radix, and CSS variables for **dark and light** theming across **60+** design-system components adopted by **9** product squads.

Etsy **React Developer**

Brooklyn, NY • Jul 2019 - Feb 2022

- Built **client-side** routing and navigation with **React Router v6** plus nested routes and layouts, route guards for authenticated and gated experiences, and deep-linking with URL-as-state patterns across **90+** unique routes, eliminating full-page reloads on **14** critical flows.
- Owned React testing and the QA program with **Jest and React Testing Library** for unit and integration tests, Cypress for end-to-end coverage on checkout and listing flows, and Storybook plus Chromatic for visual regression, lifting test coverage from **48%** to **86%** and dropping UI regression escapes per release by **70%**.
- Drove build tooling, accessibility, and React best practices including **Vite and esbuild** migration off Webpack, ESLint and Prettier rule sets enforcing concurrent-features safety, and WCAG 2.2 audits with keyboard-nav and ARIA fixes, cutting axe-core violations per page from **64** to **4**, partnering with Design Systems and Engineering teams across **8** product surfaces to ship **6** React best-practice RFCs and onboard **4** junior React developers.
